

## PRESS RELEASE

June 14th, 2020

### **VMI and Lemoine**

Together with our long time customer Lemoine Holland, VMI started a project to increase production capacity for face masks in the Netherlands. VMI assisted in the project with local know how, transportation and technical support. This all to ensure that Lemoine can start up production as soon as possible and produce about 1 to 1.5 million masks a week. The production of medical face masks will be commissioned by the Dutch government and they will distribute the masks to the healthcare institutions and other sectors that need the masks.
